DETAILED ACTION

1. This Office Action is made in response to applicant's amendment after final filed on 2/25/2008. Claims 1, 4, 5, 8-23, 25, and, 26 are currently pending in the application. An action follows below:

Allowable Subject Matter

2. Claims 1, 4, 5, 8-23, 25, and 26 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a power control system for a liquid crystal display device and backlight. Independent claims 1, 15, and, 26 identify the uniquely distinct features "wherein the patterned conductor is configured to transmit the conductor voltage, the transmitted voltage representing the abnormal condition if a power surge exists in the high voltage output, representing the abnormal condition if there is no detection of induced voltage from the high voltage output, and representing the abnormal condition if the level of the induced voltage indicates that the high voltage is less than a predetermined voltage level". The closest prior art, Toshiba Corp. (JP 2002341775), Oda et al. (USPN: 5151631), and Lee et al. (USPN: 5854617) disclose power supplies with abnormal voltage sensors for corona discharge and other abnormal operation states, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2629

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
